

Module C App

Developer Implementation Guide — v1.0

This document translates the Word specification files (lesson00–22, practice00–22) into concrete implementation instructions. Read alongside the Word files and `module_c_dev_spec.docx`.

Document	Purpose
lesson00–22_module_c.docx	Content + visual design for each lesson (6 screens each)
practice00–22_module_c.docx	Practice exercises per node (3 rounds × 3 questions)
lesson_map_module_c.docx	Duolingo-style node map visual reference
module_c_dev_spec.docx	Technical spec: colors, components, data model
This PDF	Implementation guide: step-by-step build instructions

1. App Architecture

1.1 Overall Structure

The app has three layers:

Home Screen	Lesson Flow
Shows the Duolingo-style node map.	Tapping a node opens 6 content screens.
Nodes: done (green) / active (pulse) / locked (gray).	After screen 6, opens Practice (3 rounds).
Source: lesson_map_module_c.docx	Source: lesson##_module_c.docx + practice##_module_c.docx

1.2 Screen Flow Per Node

Node tap → Lesson Screen 1 (WOW)

→ Screen 2 (THE TOOL)

→ Screen 3 (WATCH IT)

→ Screen 4 (TRY IT) ← interactive

→ Screen 5 (YOUR TURN) ← interactive

→ Screen 6 (ONE SENTENCE)

→ Practice: Round 1 (3 questions)

→ Practice: Round 2 (3 questions)

→ Practice: Round 3 (3 questions)

→ Completion screen → back to map

1.3 Navigation Rules

- Screens 1–3 (WOW, THE TOOL, WATCH IT): read-only. Swipe left or tap ■ to advance.
- Screens 4–5 (TRY IT, YOUR TURN): interactive. ■ button appears only after the student answers.
- Screen 6 (ONE SENTENCE): read-only. Tapping "Next" opens Practice.
- Practice rounds: each question on its own screen. Answer → feedback → next.
- Back navigation: always allowed (swipe right). Student may re-read any screen.
- No auto-advance: student controls all navigation.

2. Node Map (Home Screen)

2.1 Layout

The map follows an S-shaped winding path — nodes alternate left/right/center across rows, exactly as shown in `lesson_map_module_c.docx`.

Row	Alignment	Nodes
1	Center	00, 01, 02
2	Right	03, 04
3	Left	05, 06, 07
4	Right	08, 09
5	Left	10, 11, 12
Milestone	—	Part A Trophy
6	Center	13, 14, 15, 16
Milestone	—	Part B Trophy
7	Center	17, 18, 19
8	Right	20, 21, 22
Completion	—	Course complete ■

2.2 Node States

State	Visual	Trigger
done	Green bg (#0F6E56) + gold star badge	UserProgress.completed === true
active	Navy bg (#1E3A5F) + teal pulse ring	Last lesson where completed is false
locked	Gray bg (#CBD5E1) + ■ icon	All nodes after "active"

2.3 Section Banners + Milestones

- Section banners (Part A / B / C): full-width colored strip with section title. Not tappable.
- Milestone nodes: trophy icon + completion message. Unlocked automatically when all nodes in that Part are done. Not tappable.
- No locking enforcement: all nodes are always tappable. "Locked" is visual only — a student can tap any node and learn.

3. Lesson Screen Implementation

3.1 Screen Types and Components

Each lesson Word file contains 6 screens. The components in each screen are defined below. Match the visual design in the Word file exactly — colors, layout, and Hebrew text are all specified there.

Screen	Type	Components	Interaction
1 WOW MOMENT	Read-only	winHeader (amber) + story box + optional button	None / tap button for feedback
2 THE TOOL	Read-only	winHeader (teal) + stepTable or vocabTable + connector bars	None
3 WATCH IT	Read-only	winHeader (green) + hebrewPreview + textBox + stepTable + ok box	None
4 TRY IT	Interactive	winHeader (purple) + tlReminder + textBox + question + answer buttons	Tap answer → feedback → ■
5 YOUR TURN	Interactive	winHeader (red) + grammarNote + tlReminder + textBox + question + answerLine	Type answer OR tap button → feedback
6 ONE SENTENCE	Read-only	winHeader (navy) + banner + self-check question	Tap ■ → opens Practice

3.2 Key Component Specifications

winHeader

Two-column strip at top of each screen. Left cell = screen number (colored bg). Right cell = screen name (light bg).

```
// Colors per screen type:
```

```
WOW: #D97706 (amber) THE TOOL: #0D7A6E (teal) WATCH IT: #15803D (green)
```

```
TRY IT: #7C3AED (purple) YOUR TURN: #DC2626 (red) ONE SENTENCE: #1E3A5F (navy)
```

Answer Buttons (TRY IT)

- Default state: white bg, #CBD5E1 border, full-width, 14px text.
- After correct tap: green bg (#DCFCE7), #15803D border. Show feedback box below. Enable ■ after 1.5s.
- After wrong tap: red bg (#FEF2F2), #DC2626 border. Disable other buttons. Allow retry.
- No scoring. No penalty. Unlimited retries.

Your Turn — Free Text (YOUR TURN)

- Textarea: min height 80px, auto-expand. Placeholder: "■■■■■ ■■■■..."
- After typing: show "■■■■■ ■■■■■■" button → reveals the answer key box.
- Word counter (lessons 17–22): live count shown below textarea. Red <70, yellow 60–69 or 91+, green 70–90.

Traffic Light Reminder (TL Reminder)

Green box: "■ ■■■■: Traffic Light — ■■■■? ■■ ■■■■ = ■■■■." Shown before every TRY IT and YOUR TURN in lessons 09–12.

Grammar Note

Green box: "■ ■■■■ ■■■■■■ ■■■■: ■■ ■■■■■■ ■■■■■■ ■■ ■■■■■■ ■■■■ ■■■■ ■■■■ ■■." Shown in YOUR TURN of lessons 10, 11, 12.

4. Practice Rounds Implementation

4.1 Structure

Each practice file (practice##_module_c.docx) contains 3 rounds of 3 questions each. The practice opens automatically after the student completes Lesson Screen 6.

Round	Title	Difficulty	Notes
Round 1	■ Beginner	Recognition level	"■■■■■:" reminder shown. Student sees previous lesson ONE SENTENCE.
Round 2	■ Intermediate	Application level	Uses real texts from the course. Less scaffolding.
Round 3	■ Exam level	Exam conditions	No hints. Matches real Module C format.

4.2 Question Types

Type	Code	Hebrew Label	UI Implementation
Multiple choice	mc	■ ■■-■■■■■	4 tappable buttons, one correct. Tap → color feedback.
True / False	tf	■ ■■■■ / ■■ ■■■■	2 large buttons: green ■ / red ■. Tap → feedback.
Matching	match	■ ■■■■	Two columns. Tap left item → highlight. Tap right item → connect. On mobile: drag or tap-tap.
Fill in blank	fill	■ ■■■■	Single-line text input. Student types. Tap "■■■■■" → reveal answer key.
Mark / Highlight	mark	■ ■■■■	Text displayed. Student taps words to highlight. OR: text shown with instruction, student reads + taps "Done".
Ordering	order	■ ■■■	Items shown in random order. Student drag-reorders OR selects 1→2→3. Confirm → feedback.
Free writing	write	—■ ■■■■ ■■■■■	Multi-line textarea + word counter + "■■■■ ■■■■" button → reveals answer key.

4.3 Answer Key Display

Every question has an answer key shown AFTER the student answers. Never before.

- For mc/tf: answer key shown automatically after tap, inside a green box with ■.
- For fill/write/mark/order: show "■■ ■■■■ ■■■■" button. Student taps → answer key revealed.
- Answer key box: green bg (#DCFCE7), green left border (#15803D), ■ icon prefix.

4.4 Round Completion

- After 3rd question: show "■ Round N ■■■■! ■■■■ ■-Round N+1..." green banner.
- After Round 3: show completion screen — ■ icon + lesson name + "■ Round 1 ■ Round 2 ■ Round 3".

- Below completion: "■■■■ ■■■■■ ■■" instructions for when to redo the lesson.
- Tap "■■■■ ■■■■■" → returns to node map. Mark lesson as completed in UserProgress.

5. Data Model

5.1 UserProgress Schema

```
// Minimum required – store in AsyncStorage / SQLite / localStorage
type UserProgress = {
  lesson_id: string; // "00" through "22"
  completed: boolean; // true when Round 3 is done
  last_screen: number; // 1-6 (lesson) or 7-9 (practice rounds)
  timestamp: string; // ISO date
}
```

5.2 Screen Number Mapping

last_screen	Meaning
1	Student stopped at WOW MOMENT
2	Student stopped at THE TOOL
3	Student stopped at WATCH IT
4	Student stopped at TRY IT
5	Student stopped at YOUR TURN
6	Student stopped at ONE SENTENCE
7	Student stopped at Practice Round 1
8	Student stopped at Practice Round 2
9	Student completed all — set completed=true

5.3 Active Node Logic

```
// Determine which node is "active" (pulsing):
const activeNode = userProgressList
  .filter(p => !p.completed)
  .sort((a,b) => parseInt(a.lesson_id) - parseInt(b.lesson_id))
  [0]; // lowest-numbered incomplete lesson

// Node state:
const getState = (id) => {
  const p = userProgressList.find(x => x.lesson_id === id);
  if (p?.completed) return "done";
  if (activeNode?.lesson_id === id) return "active";
  return "locked"; // visual only – tapping still works
}
```

6. RTL, Fonts & Language Handling

6.1 Hebrew/English Mixed Content

All instruction text is Hebrew (RTL). All English passages are from the exam texts (LTR). Handle both:

- Wrap Hebrew UI text in RTL container (direction: "rtl", textAlign: "right").
- Wrap English exam text in LTR container (direction: "ltr", textAlign: "left").
- Never mix RTL and LTR in the same text run.
- Hebrew labels for English sections: "■ ■ ■ ■ ■ ■ ■ ■ ■ ■:" in a separate RTL paragraph above the LTR English block.

6.2 Font Stack

Use	iOS	Android	Web
Hebrew body	SF Hebrew	Noto Sans Hebrew	Arial, sans-serif
English body	SF Pro	Roboto	Calibri, Arial
ANSWER lines	Courier New	Courier New	Courier New, monospace
Fallback	System	System	System

6.3 Text Size

- Body Hebrew: 16sp (sp = scale-independent pixels on Android, pt on iOS)
- Section headers: 18sp bold
- Answer buttons: 15sp
- Small labels (step numbers, round badges): 12–13sp

6.4 Emoji Rendering

Some emoji (■ ■ ■ ■ ■ ■ ■ ■) are used in the UI. Verify rendering on both iOS and Android before shipping. On Android, fallback to text equivalents if emoji appear as boxes.

7. Component Reference

7.1 Color Tokens

Token	HEX	Used for
Navy	#1E3A5F	Primary headers, navy boxes, ONE SENTENCE screen
Teal	#0D7A6E	THE TOOL screen, connector bars, answer key border
Green	#15803D	Correct answers, WATCH IT screen, done nodes
Amber	#D97706	WOW MOMENT, warnings, Round 2 badge
Red	#DC2626	Wrong answers, YOUR TURN screen, errors
Purple	#7C3AED	TRY IT screen, vocabulary, Round 3 badge
Orange	#EA580C	Eye Catchers, most/only, connector bars
Navy bg	#EBF0F8	Light navy background (boxes, cards)
Teal bg	#D1FAF5	Light teal background, answer key
Green bg	#DCFCE7	Light green background, correct answer
Red bg	#FEF2F2	Light red background, wrong answer
Gray	#F8F AFC	Neutral card background
Border	#CBD5E1	All card and table borders

7.2 Core Components

Component	Description
Box	Colored card. Props: bg (light color), border (accent color), leftBorder (thick left only). Contains any child components.
Button	Full-width answer button. States: default / correct / wrong / disabled. Animated color transition 200ms.
winHeader	Two-cell header strip. Left: screen number (colored bg). Right: screen name (light bg).
answerLine	Two-column: label (30%) + blank input line (70%). Border bottom only.
stepTable	Left column: numbered step label (accent color). Right column: instruction text. Full-width, light bg.
vocabTable	Three columns: English (teal) Hebrew Example (italic). Striped rows.
connectorBar	Single row of N equal cells, each one English connector word on colored bg.
twoCol	Two equal columns side by side with different bg colors. Used for ■ vs ■ comparisons.
progressDots	Three equal cells: Round 1 / Round 2 / Round 3. Active = navy bg, inactive = gray.

8. Special Behaviors

8.1 Word Counter (Lessons 17–22)

YOUR TURN in writing lessons must show a live word counter below the textarea.

```
const countWords = (text) => text.trim().split(/\s+/).filter(Boolean).length;

// Color rules:
if (count < 60) color = "#DC2626"; // red
if (count >= 60 && count < 70) color = "#D97706"; // amber
if (count >= 70 && count <= 90) color = "#15803D"; // green
if (count > 90) color = "#D97706"; // amber
```

8.2 Penalty Table (Lesson 20)

THE TOOL screen in L20 shows the official penalty table as a static component. Not interactive — read-only reference.

Words	Penalty
70–90	■ No penalty
60–69	■ –1 point
50–59	■ –3 points
40–49	■ –6 points
30–39	■ –10 points
< 25	■ 0 on entire writing task

8.3 P15 Checklist (Lesson 21)

Lesson 21 contains a pre-submission checklist with 5 checkboxes. In the app, make these interactive checkboxes (not just visual). Student taps each ■ → becomes ■.

- ■ ■■■■ ■■ ■■ ■■■■■■ 1–8? ■■■■ ■■■■■■ ■■ M?
- ■ ■■■■ ■■■■■■ ■■■■■■? ■■■ 70–90?
- ■ ■■■■■■ YES ■-NO ■■■■■■?
- ■ ■■ ■■ 2 ■■■■■■ + ■■■■■■■■ ■■■■■■?
- ■ ■■ ■■■■■■ ■■■■■■ ■■■■■■ ■■■■■■?

8.4 The Tool — First Time Explanation (Lesson 00)

Screen 2 of Lesson 00 contains a "■■■ ■■ THE TOOL?" explanation box. This box should ONLY appear in Lesson 00 — not in any other lesson. All other lessons show THE TOOL content directly.

9. Pre-Build Decisions

Resolve these before starting development. Each decision affects architecture significantly.

Decision	Option A	Option B	Impact
Platform	React Native (Expo)	Flutter	Codebase + team skills
YOUR TURN free text	Textarea (recommended)	Skip button + reveal	UX complexity vs engagement
Progress storage	Local only (AsyncStorage)	Cloud sync (backend needed)	Privacy + complexity
Matching exercise	Drag-and-drop	Tap-tap select	Mobile UX complexity
Analytics	None	Amplitude / Firebase	Privacy, complexity
Practice unlock	Always open	Unlock after lesson 6	Pedagogical choice
Font licensing	System fonts	Custom Hebrew font	Design quality

9.1 Recommended Build Order

Phase	Deliverable	Lessons
Phase 1	Core lesson flow (read-only screens 1–3)	L00, L01, L02
Phase 2	Interactive screens (TRY IT, YOUR TURN)	L03, L04, L05
Phase 3	Full lesson with practice rounds	L06 (complete node)
Phase 4	Node map + UserProgress	All nodes, map screen
Phase 5	All 23 lessons content	L07–L22
Phase 6	All 23 practice files	practice00–22
Phase 7	Polish: animations, RTL, word counter	All

10. Complete File Index

10.1 Lesson Files

File	Topic	Part	Key Component
lesson00	"■■■■ ■■■■"	A	THE TOOL first-time explanation
lesson01	■■■ ■■■■■■	A	Hebrew preview box
lesson02	Traffic Light	A	Dictionary strategy
lesson03	P1 — ■■■■■	A	stepTable 5 steps
lesson04	■■■■■■ — GPS	A	Eye Catcher = GPS
lesson05	■■■■ — ■■■■■	A	Name → paragraph link
lesson06	NOT — ■■■	A	Hunt for false
lesson07	most / only	A	One specific answer
lesson08	however / but	A	Pivot word
lesson09	Multiple Choice	A	Paragraph-only + distractor types
lesson10	Short Answer	A	Why/When/How/Where table
lesson11	Complete the Sentence	A	Because + In order to
lesson12	Two Answers	A	AND/In addition signals
lesson13	■■■■■ ■■■■■	B	vocabTable 10 words
lesson14	■■■■■ ■■■■■	B	Eye Catcher vocabTable
lesson15	■■■■■ ■■■■ ■■	B	15 content words
lesson16	■■■■■ ■■■■ ■■	B	15 content words + sentence starters
lesson17	■■ ■■■■■ ■■■■?	C	Official rubric table + ■■■■■ topics
lesson18	P14 — ■■■■■	C	Annotated sample answer
lesson19	■■■■ ■■■■■	C	Rubric as WOW + subject+verb
lesson20	70–90 ■■■■■	C	Penalty table + word counter
lesson21	■■■■■ ■■■■	C	P15 + Checklist + time plan
lesson22	What changes?	C	Real Bagrut question + draft table

Questions?

Contact the course author. This guide + all Word files = everything you need to build the app.
